Percent figures for Poverty Status by Race & Age represent the people living above or below the poverty level divided by the total # of people for that category. I.e. if there are 1,000 people representing the 12 to 17 years category of race Q, and 600 people live above the poverty level and 400 people live below the poverty level, then the percentage would be 60% and 40% for people living above and below the poverty level, respectively.
